

Why Choose OTM Support?

OTM Support provides a quality electrical drafting service, with a quick turn around at a reasonable price. Our customers agree that OTM Support provides an outstanding electrical drafting service, with delivery that always meets their needs, at a price that has not been met.

About OTM Support

Since our founding in 2018, OTM Support has been committed to serving our clients with high quality electrical design and drafting services. We have consistently invested in our team's skills and knowledge. This commitment to excellence has enabled us to broaden our offering to include a range of Project Document Services, ensuring we can provide comprehensive support throughout your project lifecycle.

Electrical Drafting Services

Our drafters have trade and engineering backgrounds allowing for design capabilities beyond the average AutoCAD user. We offer the full range of electrical drawings including schematics, panel layouts and shop drawings, Bill of Materials, cable connection diagrams, fire plans and site layouts. You can involve us at any stage of the project from new builds to upgrades of existing infrastructure. We understand that design changes can come in various forms. That's why we're equipped to work with all file types and accept revisions provided as hand-drawn sketches, scanned documents, PDF comments, photographs, or screenshots. Just share the files you have and your on-site modifications and we'll produce accurate and up-to-date drawings.

Project Document Services

- **Product Manuals:** Streamlining product information into easy-to-understand manuals.
- **Site/Functional Test Sheets:** Eliminating the hassle of deciphering handwritten notes by creating professional, branded test documentation.
- **User Manuals:** Providing end-users with clear and accessible instructions through well-structured user manuals.
- **Comprehensive Document Support:** From reports and presentations to meeting minutes and data tracking, we handle all your project documentation needs.

>> Project Highlights

OTM Support has been trusted to complete a wide range of electrical drafting projects throughout Australia.

Project	Client	Location	Year
Rockhampton Nursing Home As Constructed drawings	Rilec Electrical	Queensland	2018
PowerWater Borefield Control System	CCD Electrical	Northern Territory	2019
Darwin Katherine Battery Energy Storage System	Territory Generation	Northern Territory	2020
Amazon Fulfilment Centre Control Cabinets	Sage Automation	New South Wales	2020
Adelaide River Bores Replacement Control Panels	CCD Electrical	Northern Territory	2021
Australian Defence Fuel Farm Upgrade	Sage Automation	Northern Territory	2021
BHP Rail Grinding System	Key Source Rail	Western Australia	2022
Grace Apartments Fire Zone Plans	Bidwell Electrical	Victoria	2022
Sewer Pump Station Flood Recovery	PT Automation Solutions	Queensland	2023
Katherine PFAS Plant Chlorine Dosing Control Panel	Alto	Northern Territory	2024
Fitzroy to Gladstone Pipeline Motor Control Centres	PT Automation Solutions	Queensland	2024

Client Testimonial

“Because their drafters have trade and engineering experience, they are real thinking designers and pick up on connections between drawings that many would miss. This saves us time during the design phase and means construction and installation goes smoothly.”

*Nasim Ghorbanpour
Lead Electrical Engineer
